Triangle Legs with Arm Lift: Begin standing with feet together. Form a triangle with your legs by keeping your left foot where it is, moving your right foot out so your feet are wider than shoulder-width apart, and turn your right foot out 90 degrees. Keep your weight on both feet, your body will naturally turn slightly toward the right foot to find a comfortable position angled between your two feet. Put your left hand on your waist and your right arm at your side. Breathing in, bend your right knee, bringing your weight over your right foot as you lift your right arm with the palm of your hand facing outward in front of you, and stretch it to the sky! Breathe out, straighten your knee and bring your right arm back to your side. Repeat the movement three more times. Switch legs, putting your right hand on your waist and repeat the same movements on the left four times. Bring your feet together. Breathe and smile.
